*WP objectives & steps*

*Going beyond HTAP\_v1*

*Results of HTAP\_v2.1*

*Outlook*

- *Different definitions (e.g. Pmcoarse versus PM10)*
- *Here PM10*
- *EDGAR, TNO, US EPA BC and OC as fraction of PM*
- *MICS: seems to have the same definition- not checked possibly there are places where  $(OC+BC) > PM_{2.5}$ ????*

*New developments:*

*BC/OC are not considered part of PM (different measurements): new risks for inconsistencies*
